## Client Indemnity and Waiver

---

Welcome to Go Brown Mobile Spray Tanning company. Our objective is to help you achieve a beautiful tan and your health and safety is our main concern.

### HVLP UV Free Spray-on Tanning

Your spray on tan color will not provide you with protection from tanning beds or the sun. A broad-spectrum sun screen is recommended for protection against overexposure to UVA/UVB rays. It is strongly recommended that you do not get a spray tan if you have any sun damaged skin. Having a sunburnt skin will result in the spray tan not developing, fading faster, spray tan discolorations and a patchy outcome. It is recommended that you refrain from sun bathing and or any tanning treatment, that is not limited to and includes: sun beds, tan can, vertical tanning beds, tanning pills, tanning injections and melanotan.

The tanning solution contains color that may transfer to clothing, furniture or car seats. The tanning solution is water-based so washing will always remove the color, with the exception of silk fabrics. We suggest bringing a towel to cover your car seat and tanning in an old bathing suit or undergarment if you choose to wear one. Go Brown is not responsible for potential stains to clothing or upholstery. We will provide disposable bikini bottoms for your convenience.

If you have sensitive skin or allergies to sunless tanning products containing DHA, or if you are unsure whether you may be allergic to DHA, we suggest consulting your physician prior to tanning. Allergic reactions such as minor skin rash are extremely rare and can usually be alleviated by a simple shower. If you have never used a sunless tanning product, you may choose to have a patch test 24 hours before the full body application.

During the tanning process your Go Brown Tanning Technician may have to touch your body to properly position you for application and to remove excess product. You will be advised of any contact before it occurs.

It is important to follow the written and verbal pre and post care instructions provided by your tanning technician. Failure to do so may adversely affect your tanning results.

Duration and life span of your tan is based on many factors such as skin condition, exfoliation rate, lifestyle, age, etc. Go Brown Mobile Spray Tanning Company or its certified technicians has no control over these factors and makes no claims with regard to duration. Maintaining your spray tan requires regular proper care. Consult your Go Brown Spray Tanning Technician for tips, aftercare instructions and products to maximize your sunless tanning results.

Pregnant women should consult a physician prior to using sunless products. Please check one:
